

# Thomas Cantwell

Full-Stack Developer

3640 Ross Rd, Palo Alto, CA 94303 • (650) 387-5366 • cantwell.tom@gmail.com • thomascantwell.com

## ABOUT

---

Full-stack developer with 5+ years of agency experience building production systems end-to-end. Backend-leaning, but comfortable across the stack, including migrations and infrastructure work.

## EXPERIENCE

---

### Future Foundry — Full Stack Developer

May 2021 – Present

Remote web and app development agency. Contracted across a diverse range of clients and industries, owning responsibilities including database design, backend architecture, and frontend implementation.

### Attunement (YC S24) — AI Psychology Platform

2024 – 2025

*React | Next.js | Python | PostgreSQL | Supabase*

- Built full-stack features for a HIPAA-compliant AI platform, including document ingestion pipelines, psychological report analysis (WISC, WAIS), and interactive chat interfaces
- Shipped MFA and HIPAA-compliant intake forms and patient flows
- Designed a custom HIPAA compliant audit system in Supabase covering the entire platform
- Embedded with the founding team on roadmap and release planning across the engagement

### Lux Capital

2022 – Present

*Vue 3 | NestJS | PostgreSQL | TypeORM | Auth0 | Redis | GCP*

- Led cross-team Heroku-to-GCP migration and currently maintain production GCP infrastructure
- Upgraded LP-facing annual keynote from React to Next.js and internal VC dashboard from Vue 2 to 3
- Rebuilt the admin panel login system with a multi-layered Auth0 integration
- Integrated Attio CRM to sync across 450+ portfolio companies, with automatic retries and rate-limiting
- Partnered with finance team on data integrity tooling (date-range diff feature) and cut main endpoint latency from 30s to 1s; reduced daily sync job runtime by 97%

### Warner Brothers — Beetlejuice Beetlejuice

2024

*React | Node.js*

- Built CMS and roles system for activations and gallery backend with i18n support across 40+ global markets

### Tiny Goliath — Amazon Fulfillment App

2023 – 2024

*Ruby on Rails | React | PostgreSQL*

- Led backend development from inception to launch while working closely with the frontend developer
- Integrated Shopify and Amazon's Selling Partner APIs, and securely managed customer data using AWS IAM
- Developed sync protocols to manage data flow and data consistency in distributed environments

### US Marines — Station Select & Activation Tools

2023 – 2024

*Electron | Node.js | React | LokiJS*

- Designed new database schema to support new functionality while still supporting legacy data for viewing and uploading
- Facilitated the launch of more customizable options and expanded field kit availability

## CollegeAidPro — MyCAP

2021 – 2023

*Next.js | React | PHP Laravel | MySQL | HTML | CSS*

- Developed D2C MyCAP student portal including user dashboards, search/filtering, payment integrations, scholarship matching, and user management
- Planned and scoped full v2 build and timeline of MyCAP D2C platform while also client-facing
- Collaborated with another vendor to integrate a custom API, co-design new features, and optimize shared database table structures
- Implemented whitelabeling architecture for MyCAP partners including theming, Auth0 authentication, and SSO tokens
- Designed intricate user interfaces optimizing user experience for complex forms

## Better Brand

2021

*Next.js | Node.js | PostgreSQL*

- Built full-stack headless e-commerce platform with product catalog, checkout flows, subscriptions, and Stripe payment integrations

## Ready-Set-Wear, New York — Co-owner

August 2015 – January 2020

Online resale business specializing in selling designer handbags and clothing through merchant sites such as eBay and Tradesy. Managed finances, customer relations, shipments, and photography.

## SIDE PROJECTS

---

### Pixel V — Advanced Pixel Art Drawing App

*pixelvee.netlify.app*

*JavaScript | Svelte 5 | Rust/WebAssembly | HTML | CSS*

- Offloads performance-critical rendering (dither, flood fill, pixel transforms) to Rust/WebAssembly for native execution speed
- Built a hybrid Svelte 5 + Vanilla JS architecture with a dual-canvas layer system pairing offscreen pixel sampling with desynchronized GPU rendering
- Implemented vector editing tools with line, quadratic, and cubic Bézier rasterization using Bresenham's and Zingl's algorithms
- Designed a command-pattern undo/redo system with full state snapshots and a custom versioned file format

## EDUCATION

---

### Flatiron School, New York, NY

January 2020 – May 2020

*Full Stack Web Development, Ruby on Rails and JavaScript*

### University of California, Irvine

September 2006 – June 2010

*Bachelor of Arts in Studio Art*

## FRAMEWORKS & TOOLS

---

Next.js, React, Vue, Laravel, Rails, Node.js, Electron, AWS, GCP, Firebase, Vercel, Supabase, Auth0, Heroku, Photoshop

## LANGUAGES

---

JavaScript, TypeScript, Python, PHP, Ruby, SQL, HTML, CSS
